## News dal mondo CAR-T

Milano, Starhotels E.c.ho.  
4 aprile 2023

### Caso Clinico DLBCL

*Stefania Bramanti  
Sezione di Terapia Cellulare  
IRCCS Istituto Clinico Humanitas*

# Clinical presentation

F.B. 71 y.o., male

## Comorbidity

- Arterial hypertension
- Dyslipidemia
- Type 2 Diabetes
- Occlusive peripheral arterial disease

Onset - October 2020

## Symptoms and signs

- Weight loss (20 kg from July)
- Vomiting

## CT scan abdomen

- 10 cm mesenteric lymphadenopathy
- Duodenal thickening

# Diagnosis and staging

## **EGDS**

Hyperemic and edematous  
mucosa  
Severe duodenal stenosis

## **Biopsy**

DLBCL NOS  
Ki67 70%  
BCL2 traslocation  
p53 mut

## **PET-scan and CT scan**

No other localization

**Bone marrow biopsy:** negative

## **DLBCL, GC type**

Myc -, BCL2 traslocation, p53 mut  
Stage II EBX

CNS-IPI II  
R-IPI I  
IPI II  
NCCN-IPI IV

# First line therapy and relapse

## First line treatment

Oct – Dec 2020 **R-CHOP x 3 cycles**

Jan 2020 Sars-Cov2 pneumonia and long-term positivity

4 March 2020 Negativization

**PET and CT scan reevaluation:** CR (DS3; 4 cm x 4 cm)

**Age, Comorbidity and Complete Response achievement**  
→ strict follow-up

## May 2022 – Relapse

Clinical presentation: vomiting and nausea

CT scan: enlargement of mesenteric lesion 10 x 6 cm

PET scan: mesenteric and duodenal lesion (DS5)

Biopsy: DLBCL relapse

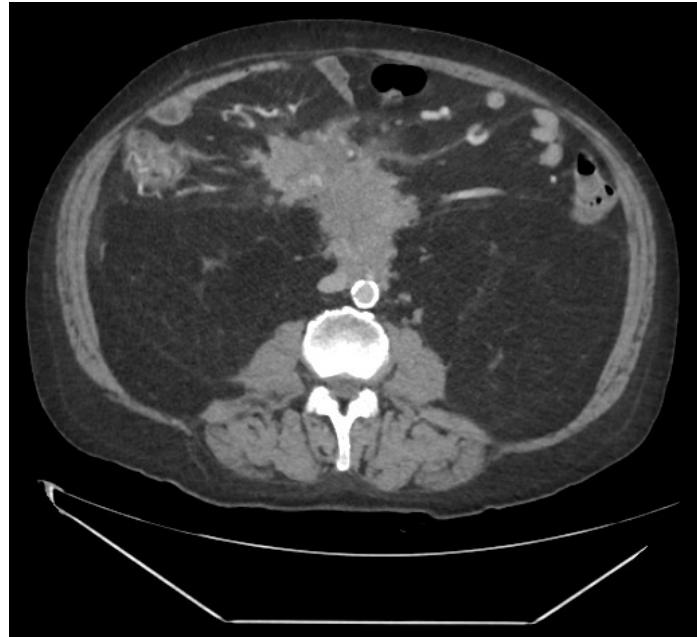

# Second line therapy

## May 2022 - ICH collegial discussion

CAR-T cell therapy predisposition  
II line: R-Gemox  
Early revaluation

## Second line treatment

31/05/2022 Apheresis  
  
**8/06/2022 – 02/07/2022 hospitalization:**  
Prerenal AKI and vomiting  
R-Gemox  
Clinical progression → duodenal bypass (endoscopy)  
  
**17/7/2022 PET scan: SD**

# CAR-T and +30/+60 revaluation

## **CAR-T infusion Hospitalisation - 27 July – 08 Aug**

Product: Tisagenlecleucel (Kymriah)

Conditioning: Flu-Cy

Complications: CRS G0, ICANS0, Neutropenia G3

## **+ 30d PET scan revaluation**

RC (DS3) → + 60d early revaluation

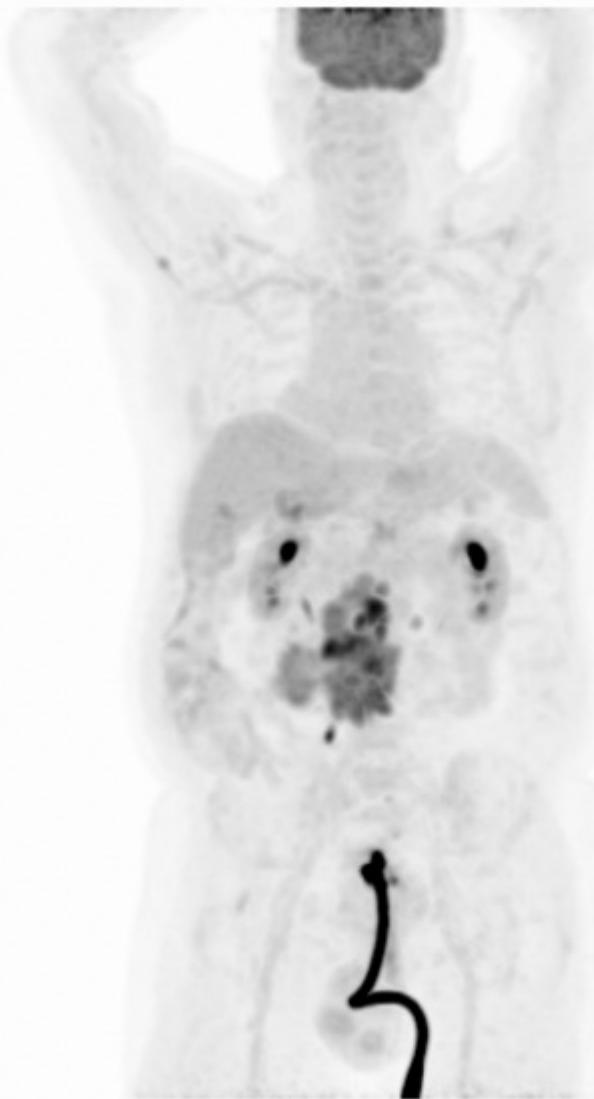

## **+ 60d PET scan revaluation**

RC (DS3) → + 90d revaluation

## **+ 90d PET scan revaluation**

RC (DS2)

**PET-tb** pre CAR-T cell therapy

**PET-tb** +30d

**PET-tb** +60d

# Last follow up

February 2023

**+ 190 from CAR-T cell therapy**

Well being at home, apyretic.

Normal blood count, normal hepatorenal function, PCR negative.

**+180d PET scan revaluation → RC (DS2)**
